"There is nothing noble in being superior to your fellow man; true nobility is being superior to your former self."

Service Now Hiring Team   *February 25, 2016*

Job Application for Software Engineer - Platform Development
Dear Service,

About Me_____

I'm a FullStack developer passionate in all things having to do with web development and software development in general. I have worked in hardware, software, and support. From greenfield design/development, full lifecycle, on-site integration, and field support. Technology has the greatest potential for a positive impact on the world. That's what motivates me, that's what I live for.

Why Service Now?_____

A good friend of mine, Patrick O'Friel used to work on the network admin team and had nothing but good things to say about the dev teams and direction of the company in general. I have worked in both highly technical and highly technically challenged environments. The latter tend to suffer from extreme resource/time constraints and inefficiencies caused by the lack of technical knowledge/support. Service Now presents an opportunity to help these companies/organizations, to have a positive impact on a greater scale than I could accomplish alone.

Why Me?_____

My drive to keep learning, growing, and adapting to new technology is relentless. I don't stop at 'good enough'. When my responsibilities are fulfilled I seek out room for improvement, opportunity to help others grow/improve, research the potential of emerging technologies, reach out to the wider dev and open source community. From what Service Now has the culture I'm seeking and I'd love to be a part of your team.

Respectfully Sent,

Evan S. Plaice
